
Women of Good Samaritan

Projects for 2012-2013

Cancer Unit Renovations

Renovations to the inpatient cancer unit will allow each patient to have a private room with state-of-the-art amenities and advanced medical equipment. Women of Good Samaritan will be supporting the project with funds for the family consultation room, creating a private, comfortable space for physicians, patients and families to meet.

Sinks for Wilcox Women's Pavilion

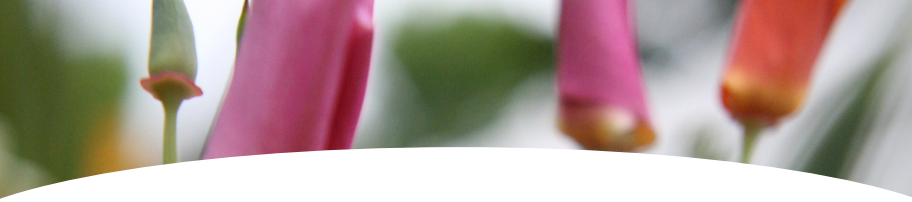
Larger sinks with sloping sides and offset faucets will allow full body submersion for the bathing of newborns, complying with the latest recommendations from the Academy of Pediatrics.

VeinViewer Vision Imaging System

This new technology in the Emergency Department will allow rapid IV placement in patients whose veins are otherwise difficult to access, including pediatric, renal and chemotherapy patients.

Bladder Scanner for Kern Critical Care Unit

This tool will help our nursing staff to accurately identify appropriate need for catheterization in our critical care patients. Avoiding unnecessary catheterization reduces the risk of infection.



Women of Good Samaritan

Supporting Good Samaritan Medical Center since 1977

Women of Good Samaritan have contributed more than $1.4 million dollars to enhance patient care and provide much needed equipment and improvements, including:

- Comfort care rooms
- Construction, equipment and program costs for the Breast Health Center
- Family Support Services Caregiver Program
- Family waiting rooms for Heart Services, Kern Critical Care Unit and the Comprehensive Cancer Center
- Fetal monitors, infant warmers and pediatric code equipment
- Heart monitors, heart health screenings and cardiac rehab equipment
- Nursing scholarships
- Refurbishment of Wilcox Women's Pavilion
- The Stenzel Healing Garden Pavilion
