Learning objectives

1. State the indications for minimally invasive surgery for pancreatic tumors.
2. Describe the background for hepatic radioembolization for primary and metastatic hepatic malignancy.
3. Recognize the struggles children face medically and neurocognitively after going through cancer treatment.
4. Identify common challenges of radiating children.
5. Discuss the short- and long-term impact of pediatric oncology treatment on psychosocial functioning.
6. Review the role of an oncology pharmacy navigator in a system cancer program.
7. List factors that can attenuate radiation dermatitis.
8. Define the role of the dietitian in supporting patients and families throughout cancer treatment.
9. Discuss how art therapy can support patients and their families to process their experience with cancer.
10. Identify the role of massage therapy in providing supportive care for oncology patients.

Target audience

Legacy Health is committed to quality and excellence through a multidisciplinary team approach throughout the cancer care continuum. This annual conference is designed for any individual involved in the administration of radiation treatment for cancer and/or the care of radiation oncology patients, including administrators, dosimetrists, physicists, radiation therapists, nurses, rehabilitation therapists, social workers, dietitians or other health care professionals.

Accreditation

This program is approved by ASRT for 6.5 Category "A" contact hours. NASW has provided 7.0 contact hours for MSW credits. Accreditation has been applied for from MDCB for CMD contact hours.

Continuing education credit has been provided by Legacy Health Clinical Practice Support and approved by the California Board of Registered Nursing, provider number CEP8749 for 7.0 contact hours.
