Data Field List for Recipient Scientists

Please check the box next to the data field you are requesting:

<input type="checkbox"/>	Specimen code number
<input type="checkbox"/>	Age at diagnosis
<input type="checkbox"/>	Age at surgery
<input type="checkbox"/>	Gender
<input type="checkbox"/>	City/State of Residence
<input type="checkbox"/>	History of tobacco use and pack-years
<input type="checkbox"/>	Prior cancer history
<input type="checkbox"/>	Prior familial cancer syndrome history
<input type="checkbox"/>	Family history of cancer in primary relatives
<input type="checkbox"/>	Survival days (between diagnosis and date of most recent follow-up)
<input type="checkbox"/>	Clinical disease status at last follow-up
<input type="checkbox"/>	Pre-analytic variables (pre-analytic handling deviations outside of biorepository quality management criteria, e.g., warm ischemia time > 60 mins)
<input type="checkbox"/>	Specimen type: primary, recurrent, metastatic
<input type="checkbox"/>	Metastatic tumors: date of initial cancer diagnosis
<input type="checkbox"/>	Tissue site
<input type="checkbox"/>	Tissue histology
<input type="checkbox"/>	Pathologic status: malignant; malignant/ invasive; malignant/ pre-invasive; metastatic; non-malignant; non-malignant/diseased; not specified; pre-malignant
<input type="checkbox"/>	AJCC stage at time of obtaining specimen and/or TNM postprocedure
<input type="checkbox"/>	For metastatic and recurrent disease: pathologic or clinical AJCC stage at diagnosis
<input type="checkbox"/>	Specimen comments: information not captured in data points that may be relevant
<input type="checkbox"/>	Disease status within 24 hours after obtaining specimen (NED, AWD, DOD, DOC)
<input type="checkbox"/>	History of chemotherapy, radiation, hormone, or bone therapy (circle)
<input type="checkbox"/>	Generic prognostic factors (grade, differentiation, LVI, D-LVI, PNI)
<input type="checkbox"/>	Breast prognostic factors (ER, PR, Her2, Her2FISH, KI67, oncotype dx, mammaprint)
<input type="checkbox"/>	Colorectal prognostic factors (IBD, EGFR, Kras, BRAF, microsatellite instability, MLH-1, MSH-2, MSH-6, PMS2)
<input type="checkbox"/>	Gastric prognostic factors (Her2, Her2FISH, <i>H. pylori</i>)
<input type="checkbox"/>	Gynecologic prognostic factors (p16, p53, MLH-1, MSH-2, MSH-6)
<input type="checkbox"/>	Lung prognostic factors (ALK, EGFR)
<input type="checkbox"/>	Ovarian prognostic factors (ER, PR)
