2008 Children in the Garden Restoration and Rehabilitation in Nature

Legacy Emanuel Children's Hospital Garden
Oregon Burn Center Garden

Workshop repeats
March 24, 2008
August 11, 2008
October 20, 2008
9:00 a.m.–3:30 p.m.

Legacy Emanuel Children's Hospital
Portland, Oregon

2008 Children in the Garden

Restoration and Rehabilitation in Nature

Objectives

Participants will:

1. List three benefits of gardens in pediatric programming.
2. Design two new garden-related activities to enhance clinical programming for each season.
3. Summarize one research study relevant to your setting.
4. Outline planning steps for garden development including design, collaborations, fundraising, programming, maintenance and evaluation.

Target Participants

Pediatric rehabilitation therapists, managers, pediatric team members, hospital schoolteachers, garden designers, fundraisers, horticultural therapists, healthcare students and garden volunteers.

Conference Team Leaders and Lead Instructors

Anita Asmussen, M.A./CCC, manager, Pediatric Development and Rehabilitation Program at Legacy Emanuel Children's Hospital. Anita has participated as part of the interdisciplinary pediatric garden team since 1996. In her clinical practice, she is an avid user of the garden to meet

the therapeutic needs of her patients as well as the needs of their families.

Teresia Hazen, MEd, HTR, QMHP, registered horticultural therapist and coordinator of Legacy Health System Therapeutic Gardens and Horticultural Therapy. Teresia has facilitated the interdisciplinary pediatric garden team since 1996. The award-winning Emanuel Children's Hospital garden serves all pediatric programs including the family, well siblings, all hospital patients, staff and the community as a public garden.

Other instructors will include a range of garden users: pediatric rehabilitation therapists, Child Life, hospice, the arts, physicians, nurses, managers, spiritual care team, community relations staff, families and more.

Key Topics

- Benefits of gardens in pediatric programs
- Therapeutic garden characteristics and key elements in garden design
- The interdisciplinary team focus in design and programming
- Clinical programming focus
- Pediatric nature stations
- A thematic approach with plants and nature activities for four seasons
- Independent and structured activities in the garden
- Sensory integration approaches
- Meeting the needs of the patient, well siblings, family, staff and visitors
- Public relations and marketing benefits
- Garden tours (rain or shine)
- Hands-on session planning and client activities
