Randall Children's Hospital at Legacy Emanuel strives to improve the care of children in the Pacific Northwest. Our staff cares for critically ill children in highly specialized environments. We would like to invite you to join us for our clinical education programs.

For more information or questions about any of our education programs, please contact the PediNet Program at 503-413-3657.

*In accordance with the Americans with Disabilities Act, Legacy Health seeks to make these conferences accessible to all. If you have a disability that might require special accommodations, please contact us at 503-413-3657.*

## CE accreditation

CE credit has been provided by Legacy Health Patient Care and approved by the California State Board of Nursing, provider number CEP 8749.

# Pediatric Advanced Life Support Program (PALS)

## Overview

The American Heart Association Pediatric Advanced Life Support course is based on scientific evidence from the 2010 AHA Guidelines for CPR and ECC. The goal of the PALS course is to aid pediatric health care providers in developing the knowledge and skills necessary to efficiently and effectively manage critically ill infants and children, resulting in improved outcomes. Skills taught include recognition and treatment of infants and children at risk for cardio-pulmonary arrest, the systematic approach to pediatric assessment, effective respiratory management, defibrillation and synchronized cardioversion, intraosseous access and fluid bolus administration and effective resuscitation team dynamics.

## Desired outcomes

- Recognize and manage a child in respiratory distress or failure and/or compensated or hypotensive shock
- Describe key elements of resuscitation team behaviors and explain why the foundation of successful resuscitation includes both mastery of basic skills and effective team dynamics
- Prevent further deterioration of the child's condition during the stabilization and transfer phases of care

## Target audience

This course targets pediatricians, emergency physicians, family physicians, physician assistants, nurses, nurse practitioners, paramedics, respiratory therapists and other health care providers who initiate, direct or participate in advanced life support during pediatric emergencies.

## PALS Provider Status

Upon successful completion, participants will receive an AHA-issued PALS Provider Card, which is valid for two years after the issue date. To maintain current status, all providers must complete a renewal course prior to the expiration date and provide proof of current AHA-issued PALS Provider Status at the renewal course.

## BLS recertification option

All PALS students must demonstrate good BLS skills. This course offers an optional BLS certification component built into the course at no extra cost. The BLS Course Guide is included with student materials if you request the text materials in your registration.

## Off-site courses

Group classes at your location may be arranged upon request. Please call 503-413-3657 or email [pedinet@lhs.org](mailto:pedinet@lhs.org) for more information.

## CME accreditation

Legacy Health is accredited by the Oregon Medical Association to sponsor continuing medical education for physicians. Legacy Health designates this live activity for a maximum of 13 *AMA PRA Category 1 Credit(s)*<sup>™</sup> for the Initial Provider Course and a maximum of 7 *AMA PRA Category 1 Credit(s)*<sup>™</sup> for the Renewal Course. Physicians should only claim credit commensurate with the extent of their participation in the activity.

## Disclosure

Detailed faculty disclosures will be made available to participants prior to the activity. All planning committee members have disclosed they have no relevant financial relationships with commercial interests that may have a direct bearing on the subject matter of this CME activity.

## CE hours

Available contact hours include 16 hours for the initial provider course and 9 hours for the renewal course.

## Student materials

The Pediatric Advanced Life Support Course Guide includes the PALS Student CD, PALS Precourse Checklist, PALS Pocket Reference Card and BLS course book.

*The American Heart Association strongly promotes knowledge and proficiency in BLS, ACLS and PALS and has developed instructional materials for this purpose. Use of these materials in an educational course does not represent course sponsorship by the American Heart Association. Any fees charged for such a*

*course, except for a portion of fees for AHA course material, do not represent income to the association.*

**If you do not receive your text materials within 30 days of the course, please contact PediNet at 503-413-3657 to confirm shipment.**

## Registration information

Registration should be confirmed by PediNet at least one month prior to the course to allow for adequate time to study and review the course materials in preparation for this fast-paced course.

**Please include your current AHA-issued PALS card if you are planning to recertify.**

PediNet will respond to all class registration requests within three business days. We reserve the right to cancel should the course not fill, with a full refund or a rescheduling for a different class. Please contact PediNet directly if you need to reschedule or cancel your registration. Refunds will not be given for cancellations within one week of the course or for no-shows. For more information, please contact the PediNet office at 503-413-3657 or email [pedinet@lhs.org](mailto:pedinet@lhs.org).

Legacy Health employees: Please contact your manager about the Legacy employee registration process for PALS courses.

**If you do not receive confirmation regarding your enrollment via email or phone within one week of submitting your registration, please contact PediNet to confirm your enrollment status at 503-413-3657.**

### Registration fees (please check one)

- PALS Initial Course — \$310 (includes books and materials)
- PALS Initial Course — \$250 (book not included)
- PALS Renewal Course — \$220 (includes books and materials)
- PALS Renewal Course — \$160 (book not included)

**All registrations include the 2011 PALS pocket reference card.**

### Form of payment

- Check (payable to Randall Children's Hospital at Legacy Emanuel)
- Credit card # \_\_\_\_\_ Expiration date \_\_\_\_\_
- Visa  MC  American Express

Address: \_\_\_\_\_  
(If card is associated with an address different from above)

Please fax registration form, copy of current AHA-issued PALS card (if renewal), copy of BLS card (if you choose to recertify for BLS at the course) and form of payment to 503-413-2181 or mail to:

**Randall Children's Hospital  
Legacy Emanuel**  
PediNet, Room 3207  
2801 N. Gantenbein Ave.  
Portland, OR 97227

#### Note:

This course is based on the new PALS provider manual, copyright 2011.

## Neonatal Resuscitation Program (NRP)

### Overview

The Neonatal Resuscitation Program (NRP), based on American Academy of Pediatrics (AAP) and American Heart Association (AHA) recommendations, offers an algorithm-based approach to the immediate care and resuscitation of the stressed or sick neonate.

All NRP classes are in the Carl Peterson Education Center's SIM Lab, a clinical environment with high-fidelity simulation. The realistic functioning of the high-fidelity patient manikin provides optimal hands-on learning.

This course is based on the sixth edition NRP course materials, released in 2011.

### Program objectives

Upon completion, participants have the knowledge and skills for neonatal resuscitation.

### Target audience

This course is for health care professionals who might respond to a neonatal emergency at the time of delivery.

### NRP provider status

Upon successful completion, participants will receive an AHA/AAP-issued NRP card, valid for two years.

### 2011 update

**Please note: As of 2011, there is no formal difference between a recertification and initial provider course. All students must successfully complete the online examination within 30 days before their NRP course and must bring proof of their completed test on the day of the course. The NRP course offered at Randall Children's Hospital at Legacy Emanuel assumes the student**

**has mastered the written material and proceeds directly to skills stations and megacode testing. Instructions on how to access the online examination will be provided to you upon registration. Please note that there is an AAP fee for the online examination.**

### Registration information

Registration should be confirmed by PediNet at least one month prior to the course to allow for time to study and review the course materials in preparation for the online examination and to be prepared for skills stations and megacode testing.

PediNet will respond to all class registration requests within three business days. We reserve the right to cancel should the course not fill, with a full refund or a rescheduling for a different class. Please contact PediNet directly if you need to reschedule or cancel your registration. Refunds will not be given for cancellations within one week of the course or for no-shows. Please contact PediNet at 503-413-3657 or email [pedinet@lhs.org](mailto:pedinet@lhs.org).

Legacy Health employees: Please contact your manager about registration for NRP courses.

**If you do not receive enrollment confirmation within one week of submitting your registration, please contact PediNet at 503-413-3657.**

### CE hours

Available contact hours include 3 contact hours for the course.

## S.T.A.B.L.E. Learner Course (Sugar and Safe Care, Temperature, Airway, Blood Pressure, Lab Work and Emotional Support for the Family)

### Overview

The S.T.A.B.L.E. Learner Course is designed to provide health care professionals with knowledge specific to stabilizing patients during the post-resuscitation/pre-transport stabilization period. The mnemonic S.T.A.B.L.E. was designed to help providers remember the actions required to stabilize an infant. The goal of the course is to develop a uniform approach to stabilization prior to transport to improve the outcome of the sick neonate.

Our S.T.A.B.L.E. instructor team includes NICU hospitalists, neonatal nurse practitioners, NICU nurses and respiratory therapists.

### Program objective

Provide guidelines for post-resuscitation/pre-transport stabilization for health care professionals in a practical format designed for quick recall.

### Target audience

S.T.A.B.L.E. is designed for all health care professionals who provide support to a sick neonate prior to transport. Physicians, midwives, nurse practitioners, nurses, respiratory therapists and paramedics are encouraged to take this course to supplement their knowledge base to potentially improve neonatal outcomes.

### Registration information

Please register at least 30 days before the course date to allow for delivery of S.T.A.B.L.E. materials and for adequate study preparation.

PediNet will respond to all class registration requests within three business days. We reserve the right to

cancel should the course not fill, with a full refund or a rescheduling for a different class. Please contact PediNet directly if you need to reschedule or cancel your registration. Refunds will not be given for cancellations within one week of the course or for no-shows. For information, please contact the PediNet office at 503-413-3657 or email [pedinet@lhs.org](mailto:pedinet@lhs.org).

Course materials will be mailed to you upon receipt of your registration and course fees.

**We are offering the S.T.A.B.L.E. Learner Course and Physical Exam and Gestational Age Assessment as a package for \$200 per person.**

### CE hours

Available contact hours include 8 contact hours for the course.

### Off-site courses

Group classes (for initial or renewal) may be arranged upon request at your location. An accelerated four-hour version of the course is also available for an advanced practitioner audience. Please call 503-413-3657 or email [pedinet@lhs.org](mailto:pedinet@lhs.org) for more information.

## S.T.A.B.L.E. Physical Exam and Gestational Age Assessment

(Sugar and Safe Care, Temperature, Airway, Blood Pressure, Lab Work and Emotional Support for the Family)

### Overview

The S.T.A.B.L.E. Physical Exam and Gestational Age Assessment supplements the S.T.A.B.L.E. Learner Course. Numerous photos, illustrations and animations make difficult concepts easy to understand. This assessment is highly visual, unique and based on the revised Ballard exam.

### Program objectives

Upon completion of the program, participants will gain an understanding of the principles of physical exam and gestational age assessment of the neonate, both term and preterm.

### Target audience

The S.T.A.B.L.E. Physical Exam and Gestational Age Assessment is designed for neonatal nurses, pediatric interns, residents, respiratory therapists, physicians and all health care providers involved in the care of neonatal patients.

### 2013 S.T.A.B.L.E. Physical Exam and Gestational Age Assessment schedule

## AWHONN Fetal Monitoring Program (Intermediate and Advanced)

### Intermediate Fetal Monitoring

The Association of Women's Health, Obstetric and Neonatal Nurses (AWHONN) Intermediate Fetal Heart Monitoring two-day workshop focuses on promoting integration of knowledge and skills essential to nursing assessment, promotion and evaluation of fetal well-being during labor.

### Program objectives

- Demonstrate the decision-making process necessary for the proper selection and verification of fetal heart rate monitoring techniques
- Analyze fetal heart rate patterns and uterine activity and their implications for fetal well-being
- Correlate indicated clinical interventions with related maternal-fetal physiology

### Target audience

This course was developed for perinatal nurses with a recommended minimum of six months' labor and delivery experience.

### Advanced Fetal Monitoring

The Advanced Fetal Heart Monitoring workshop is a one-day course focusing on the application of essential fetal heart rate monitoring knowledge to validate advanced knowledge and skills in the management of complex maternal-fetal case scenarios.

### Program objectives

- Demonstrate necessary decision making for the proper selection and verification of FHM techniques in complex cases
- Analyze complex FHM case scenarios
- Correlate fetal heart rate patterns/ characteristics with related maternal-fetal physiology and indicated clinical interventions in complex cases

### Target audience

This course was developed for perinatal nurses who have completed AWHONN's intermediate two-day workshop or with previous advanced fetal monitoring education.

### Registration information

Attendees must be confirmed one month before the course. PediNet will respond to all class registration requests within three business days. We reserve the right to cancel should the course not fill, with a full refund or a rescheduling for a different class. Please contact PediNet directly if you need to reschedule or cancel your registration. Refunds will not be given for cancellations within one week of the the course or for no-shows.

For more information, contact the PediNet office at 503-413-3657 or email [pedinet@lhs.org](mailto:pedinet@lhs.org).

After submitting your registration form and fee, you will receive the "AWHONN Fetal Heart Monitoring: Principles and Practices" textbook. This material must be mastered before the course to ensure completion of the course and the tests.

Legacy Health employees: Please contact your manager to register.

### Off-site courses

Group classes may be arranged upon request at your location. Please call 503-413-3657 for more information or email [pedinet@lhs.org](mailto:pedinet@lhs.org).

### CE hours

Available contact hours include 18.9 hours for the Intermediate Fetal Monitoring course and 11.9 contact hours for the Advanced Fetal Monitoring course.

# Stabilization of the Neonate or Pediatric Patient for Transport

## Overview

The Randall Children's Hospital KIDS Team is a dedicated specialty transport team composed of critical care nurses and respiratory therapists trained to provide the highest level of care to the most critical neonatal or pediatric patient.

We customize our transport stabilization course to meet the needs of your team. Clients choose from a variety of topics related to neonatal and/or pediatric care. The program includes the presentation of patient case studies, consisting of the patient's pre- and post-admission course. At your request, we review cases transported from your facility.

## Program objectives

This course emphasizes pediatric and/or newborn assessment, airway management, vascular access, and fluid and electrolyte management related to stabilizing a patient for transport. Presentations are in either a didactic or skill station format, or a combination of both.

## Didactic training options

- Pediatric and/or neonatal assessment
- Pediatric airway: anatomy and diseases
- Recognition and treatment of pediatric respiratory distress and failure
- Recognition and treatment of pediatric shock
- Pediatric vascular access

- Topics related to resuscitation of the low birth weight newborn
- Neonatal intubation
- Post-resuscitation stabilization of either the pediatric or neonatal patient

## Skills station options

- Pediatric or neonatal mock codes
- Pediatric ventilation considerations
- T-piece resuscitator review
- Umbilical line placement review

## Target audience

Health care professionals who care for pediatric or newborn patients and provide stabilization for a transport

## Registration information

Training sessions are customized by selecting from the didactic and skills station options. For more information, please contact PediNet at 503-413-3657 or email [pedinet@lchs.org](mailto:pedinet@lchs.org).

## Course locations

Team members provide instruction on the Legacy Emanuel Medical Center campus or at your facility. Class size and duration depends on topics covered.

## Pediatric Acute Care On-Site Program

### Overview

Randall Children's Hospital at Legacy Emanuel developed a program that is designed to provide a didactic course and a clinical shadowing experience for nursing professionals interested in learning about providing care to children in an acute care setting.

Children are a unique patient population to serve. This program will provide exposure to some of the common topics in pediatrics and offers an introduction to family-centered care and age-appropriate approaches needed when caring for children and their families.

### Target audience

This program is intended for all registered nursing staff interested in increasing their clinical knowledge and experience in caring for the acutely ill child.

### Packages available

#### Package I — Oct. 10, 2013

*Pediatric Acute Care Didactic Course and Clinical Shadow Experience*

This is a combination course that includes eight hours of didactic and two 12-hour clinical shifts.

The didactic course work has been designed to enhance your individual clinical experience. The clinical shifts are in the acute pediatric units with a nursing preceptor, who will guide each participant through the shadowing experience.

Each clinical shadow experience is scheduled based on the availability of nursing preceptors. The clinical shadow experience must be completed within eight weeks after completion of the didactic course.

**\$475 (three days total)**

#### Package II — Oct. 10, 2013

*Pediatric Acute Care Didactic Course*

Topics for the didactic session are as described below and will be presented in an eight-hour agenda:

- Pediatric trauma
- Common respiratory ailments
- Diabetes
- Pain management
- Developmental approaches to care
- Post-operative management of surgical patient
- IV placement

**\$125**

#### Package III

*Pediatric Acute Care Shadow Experience*

This is a customized clinical experience that includes two 12-hour clinical shifts in the acute pediatric units. Each clinical shadow is customized based on the needs of the participants.

**\$350 (two days total)**

### Registration information

We will work with our pediatric clinical nurse specialist and nurse manager to identify clinical shadow experience dates, and provide additional information related to overnight accommodations and travel details. Should the didactic course not fill, we reserve the right to cancel with a full refund. For more information, please contact the PediNet office at 503-413-3657 or email [pedinet@lhs.org](mailto:pedinet@lhs.org).

## Newborn Stabilization and Care of the Higher Risk Newborn On-Site Program

### Overview

Randall Children's Hospital at Legacy Emanuel developed a program that is designed to provide a clinical shadowing experience for nursing professionals interested in learning about newborn stabilization and various levels of care.

The experience is customized based on the needs of the requesting facility. Each on-site experience is scheduled based on the availability of the instructors and requested clinicians to provide the training.

### Packages available

#### Newborn Stabilization

This package includes an eight-hour S.T.A.B.L.E. Learner Course (see S.T.A.B.L.E. program description on page 8) and two 12-hour shifts with a variety of clinical specialists, depending on the needs of the participants. Clinical shifts will be focused on newborn resuscitation with intermediate care exposure/experience.

**\$450 (three days total)**

#### Target audience

This program is intended for all nurses who provide stabilization support to newborns requiring transport to an intermediate or critical care center.

#### Level II Stabilization Shadow

A customized clinical experience including two 12-hour shifts, focused on intermediate (Level II) neonatal care.

**\$450 (two days total)**

#### Target audience

This program is intended for all nurses who provide stabilization support to newborns and desire hands-on intermediate neonatal care experience.

#### Level III Clinical Shadow

A customized clinical experience including two 12-hour shifts, focused on neonatal critical (Level III) care.

**\$350 (two days total)**

#### Target audience

This program is intended for all neonatal intermediate care nurses seeking opportunities for advanced Level II or higher acuity neonatal care experience.

#### Registration information

We will work with our NICU education staff and manager to identify a start date for the participants and provide additional information related to overnight accommodations and travel details. For information please contact the PediNet office at 503-413-3657 or email [pedinet@lhs.org](mailto:pedinet@lhs.org).

## Care of the Critically Ill Child On-Site Program

### Overview

Randall Children's Hospital at Legacy Emanuel developed a program that is designed to provide didactic course work as well as a clinical shadowing experience for nursing professionals interested in learning about pediatric critical care.

Each experience is customized based on the needs of the requesting facility. Each on-site experience is scheduled based on the availability of the instructors and clinicians requested to provide training.

### Packages available

#### Package I

##### *Pediatric Critical Care Didactic and Clinical Shadow Experience*

This is a combination course that includes eight hours of didactic and two 12-hour clinical shifts.

There are multiple lectures available to choose from to create your group's individual didactic experience. The clinical shifts are in the PICU, with nursing preceptors who will guide each participant through the shadowing experience.

**\$475**

### Target audience

This package is designed for nurses who are interested in furthering clinical knowledge and experience, focusing on PICU practice standards and guidelines.

#### Package II

##### *Pediatric Critical Care Didactic Course*

The following topics are available to choose from to create your group's

individual didactic experience. Each topic is assigned a timeframe. The clinical coordinator will work with a representative from the requesting facility to put together an eight-hour agenda to meet the needs of that group. The didactic course is available at the location of the requesting facility as well.

Please select from these topics:

- Systematic approach for assessment of the critical care pediatric patient
- Common respiratory ailments in children
- Blood gas interpretation
- Mechanical ventilation
- Pediatric cardiac defects
- Neurological conditions
- Shock
- Renal
- Endocrine
- Pediatric trauma
- Skill-specific training (example: intubation)
- Child abuse
- Pain
- Septic shock

**\$125**

### Target audience

This package is designed for nurses who are interested in furthering clinical knowledge in the area of pediatric critical care nursing.

#### Package III

##### *Clinical Shadowing Experience*

This is a clinical experience focused on the critically ill pediatric patient. Two 12-hour clinical shifts in the PICU are customized based on the needs of the participants.

**\$350**

### Target audience

This package is designed for pediatric or critical care nurses who are interested in furthering their clinical knowledge base, focusing on the critically ill pediatric patient.

a start date for the participants and provide additional information related to overnight accommodations and travel details. For information, please contact the PediNet office at 503-413-3657 or email pedinet@lhs.org.

## Pediatric IV On-Site Program

### Overview

The IV Resource Department at Randall Children's Hospital developed a program providing didactic course work, as well as a clinical shadowing experience for registered nursing professionals interested in learning about pediatric peripheral vascular access and pediatric peripheral inserted central catheter (PICC) placement.

The customized experience is based on the needs of the requesting facility or practice group. Each on-site experience is scheduled based on the availability of the instructors and clinicians requested to provide training.

### Packages available

#### Pediatric Peripheral IV Access

Two 10-hour shifts that include didactic course work and hands-on experience.

**\$290**

#### Pediatric Peripherally Inserted Central Catheter

Two 10-hour shifts that include lecture and hands-on experience.

**\$290**

### Target audience

This program is intended for registered nursing staff interested in furthering clinical knowledge and experience focused on pediatric peripheral vascular access and PICC line placement.

### Registration information

PediNet will work with our pediatric IV clinical coordinator and manager to identify a start date for the participants and provide additional information related to overnight accommodations and travel details. For information, please contact the PediNet office at 503-413-3657 or email [pedinet@lhs.org](mailto:pedinet@lhs.org).

## Neonatal/Pediatric Respiratory Therapy On-Site Program

### Overview

This is a clinical experience focused on respiratory care of the critically ill neonatal and/or pediatric patient. Two 12-hour clinical shifts in the NICU and/or PICU are customized based on the needs of the participants, including didactic training focused on specialized ventilation techniques.

### Target audience

This program is intended for all respiratory care staff interested in furthering clinical knowledge and experience, focusing on respiratory care practice standards and guidelines.

### NICU RT Program

Two 12-hour clinical shifts in the NICU are customized based on the needs of the participant.

NICU clinical shadowing may include:

- Neonatal resuscitation
- Care of pediatric cardiac patients
- BIPAP and non-invasive ventilation
- Conventional ventilation for pediatric patients
- High-frequency ventilation (to include oscillation and high-frequency VDR)
- Nitric oxide administration
- Point-of-care ABG testing
- Intubation technique

**\$350**

### PICU RT Program

Two 12-hour clinical shifts on the PICU are customized based on the needs of the participant.

PICU clinical shadowing may include:

- Pediatric resuscitation
- Care of pediatric cardiac patients
- BIPAP and non-invasive ventilation
- Conventional ventilation for pediatric patients
- High-frequency ventilation (to include oscillation and high-frequency VDR)
- Nitric oxide administration
- Management of tracheostomies and home-care ventilators
- Point-of-care ABG testing
- Intubation technique

**\$350**

### Registration information

PediNet will work with our respiratory care manager and clinical specialists to identify a start date and learning objectives. For more information, including overnight accommodations and travel details, please contact the PediNet office at 503-413-3657 or email [pedinet@lhs.org](mailto:pedinet@lhs.org).

## The future is here Randall Children's Hospital at Legacy Emanuel

Randall Children's Hospital at Legacy Emanuel receives nearly 100,000 patient visits every year. And Oregon's ever-growing population means a continued increase in demand for our services. Randall Children's Hospital is large enough to care for our growing community, now and in the future.

Every inch of our **state-of-the-art, nine-story, 334,000-square-foot building** is designed exclusively for the special health care needs of children.

### Randall Children's Hospital has 165 beds and features:

- A **Children's Emergency Department** with 22 private rooms and a staff of doctors and nurses who specialize in children's emergency care
- A 25-bed **Children's Day Surgery Unit**.
- A **Level III Neonatal Intensive Care Unit (NICU)** with skybridge access to Labor and Delivery and the Family Birth Center at Legacy Emanuel Medical Center. The NICU

features 31 single private rooms and seven rooms for twins.

- A 24-bed **Pediatric Intensive Care Unit (PICU)** with large private rooms so parents and family can remain with their children and work closely with caregivers during treatment
- **Additional space with private patient rooms** for services such as Oregon's only inpatient rehabilitation program, as well as:
  - Cardiology
  - Hematology/oncology
  - Nephrology
  - Neurology
  - Orthopedics
  - Rheumatology
  - Trauma
  - Other pediatric specialties

## Randall Children's Hospital Pediatric and Neonatal Clinical Education

### 2013 Medical Education Conferences

#### 2013 Pediatric Emergency and Critical Care Conference

This one-day Pediatric Emergency and Critical Care conference is designed to provide pediatricians, family practice physicians, emergency medicine physicians, nurse practitioners, nurse leaders and physician assistants with the latest information on pediatric emergency and critical care. Participants will gain practical knowledge from expert providers in the care of acutely ill and injured children. This activity has been approved for *AMA PRA Category 1 Credit(s)*.™

**Save the date — April 11, 2013**

#### 2013 Current Topics in Pediatrics

This one-day Current Topics in Pediatrics conference is designed to change provider competencies regarding a broad range of pediatric clinical topics. The conference is for pediatricians, family practice physicians and other primary care providers. Its purpose is to expand medical knowledge and improve clinical care. This activity has been approved for *AMA PRA Category 1 Credit(s)*.™

**Save the date — October 11, 2013**

For additional information or registration, call 503-413-3657, email [PediNet@lhs.org](mailto:PediNet@lhs.org) or visit [www.legacyhealth.org](http://www.legacyhealth.org) and search the continuing education link for PediNet classes.

#### 2013 Pediatric Grand Rounds

Pediatric Grand Rounds are designed to provide practitioners that work with pediatric patients up-to-date information on a variety of clinical subject areas. This activity has been approved for *AMA PRA Category 1 Credit(s)*.™

Grand Rounds are 7:30–8:30 a.m. at the Lorenzen Conference Center at Legacy Emanuel Medical Center.

#### Dates for 2013

January 15	April 16	July 16	October 15
February 19	May 21	August 20	November 19
March 19	June 18	September 17	December 17

For additional information or registration, call 503-413-3657, email [pedinet@lhs.org](mailto:pedinet@lhs.org) or visit [www.legacyhealth.org](http://www.legacyhealth.org) and search the continuing education link for PediNet classes.

*In accordance with the Americans with Disabilities Act, Legacy Health seeks to make these conferences accessible to all. If you have a disability that might require special accommodations, please call 503-413-3657 or email [pedinet@lhs.org](mailto:pedinet@lhs.org).*
