

Act FAST

To save your brain from stroke

In stroke, every second counts. Prompt actions can prevent further damage to the brain and help someone make a full recovery. Use the “Act FAST” tool to recognize stroke symptoms.

Know the signs of stroke and Act **FAST**:

Facial weakness—Can the person smile? Has their mouth or eye drooped?

Arm weakness—Can the person raise both arms?

Speech problems—Can the person speak clearly and understand what you say?

Time to call 911—If even one of these problems is new.

Brought to you by Legacy Health’s nationally accredited stroke program.

Our legacy is yours.
