

# Adult ECMO transfer criteria

## Consider ECMO

For adult patients, consider referral to the Legacy ECMO Center at Legacy Emanuel Medical Center if:

- Your patient is hypoxemic, PaO<sub>2</sub>/FiO<sub>2</sub> ratio <110
- Your patient is hypercarbic, pH <7.15
- You are considering prone ventilation
- When you feel your patient is not responding to management
- We are your partner in care.

## Call us

We provide a dedicated ECMO transport team that travels to facilities in the Pacific Northwest.

**Legacy One Call Consult & Transfer: 1-800-500-9111**

## Lifesaving treatment

ECMO is used to treat adult patients with conditions resulting from:

- Respiratory failure/ARDS
- Pneumonia
- Trauma/pulmonary contusions
- Sepsis
- Drug intoxication
- Aspiration
- Pulmonary embolism
- Drowning
- Inhalation injury after burns
- Asthma/hypercarbia
- Hypothermia
- Pulmonary hemorrhage

We are an acute respiratory failure center offering such advanced ventilator modalities as the VDR.
