F1: HIV Interp
POSITIVE for HIV-1 Antibodies: HIV-1/HIV-2 differentiation performed using Geenius HIV 1/2 Supplemental Assay. Legacy Laboratory Services performs and interprets this assay as a follow-up HIV confirmatory test, and presumes the referring laboratory or facility has ALREADY performed a third or fourth generation HIV screening EIA or CIA that was reactive. The above provided interpretation is not valid in the absence of a known positive third or fourth generation HIV screening EIA or CIA result. A preceding HIV screening EIA or CIA was not performed by Legacy Laboratory Services.
