SURGICAL PATHOLOGY

Collected Date: 02/23/2016 07:00

Case Number: SP-16-0002425

Surgical Pathology Report

DIAGNOSIS

This is usually the diagnosis for the case. It is a required component. The SNOMED coding will be done from this. Also, the electronic signature is attached to this text.

I will arbitrarily say that the specimens for this case are lung and liver tissue.

I am including the diagnosis of Basal Cell Adenocarcinoma for this so that we can test the SNOMED coding. I think I will also include the phrase absence of melanoma also so that we can test SNOMED for negative words.

Bryan P Desimone, DBA
(Electronic Signature)

Specimen

This is some text that would represent the specimen(s) received for this case.

Gross Description

This text would represent the text dictated by the grossing pathologist. It is usually typed by the transcriptionist on the same day that the specimen is received and dictated.
