IMMUNOLOGY

Orderable Name	Collected Date/Time	Specimen Type
Syphilis Ab Screen with Reflex (SYPH AB RFLX)	7/10/2017 11:11 PDT	Blood

Procedure	Result	Result Flag	Reference Range	Units	Footnote Symbol
Syphilis Interp	Reactive	ABNORMAL	[Non Reactive]		F1
Syphilis Ab CIA	Equivocal	ABNORMAL	[Non Reactive]		
RPR	Reactive	ABNORMAL	[Non Reactive]		
RPR Titer	1:512	ABNORMAL			
T Pallidum Ab by TP-PA	Reactive	ABNORMAL	[Non Reactive]		

Result Comments

F1: Syphilis Interp
 Syphilis is likely. Staging of disease requires clinical correlation. Reactive for Treponemal antibodies by CIA screen and non-Treponemal confirmatory test (RPR).

Orderable Name	Collected Date/Time	Specimen Type
Syphilis Confirmation with Reflex (SYPH CONF RFLX)	7/10/2017 11:12 PDT	Blood

Procedure	Result	Result Flag	Reference Range	Units	Footnote Symbol
Syphilis Interp	Reactive	ABNORMAL	[Non Reactive]		F2
RPR	Non Reactive		[Non Reactive]		
T Pallidum Ab by TP-PA	Reactive	ABNORMAL	[Non Reactive]		

Result Comments

F2: Syphilis Interp
 Syphilis is likely (either present or past infection). Staging of disease requires clinical correlation. Treponemal confirmatory test (TP-PA) is reactive. Even though the non-Treponemal test (RPR) is non-reactive, syphilis is still likely. Legacy Laboratory Services performs and interprets this assay as a follow-up Syphilis confirmatory test, and presumes the referring laboratory or facility has ALREADY performed a Treponemal antibody immunoassay screen that was reactive. The above provided interpretation is not valid in the absence of a known reactive screening result. A preceding Syphilis screening immunoassay was not performed by Legacy Laboratory Services.
