Legacy LabAlert
An Important Message from Legacy Laboratory Services

Coronavirus SARS-CoV-2 by PCR

Due to newly expanded capacity, Legacy Laboratory Services is now offering COVID-19 testing to our outreach clients. While inpatients, healthcare workers, and first responders remain a priority, we understand the importance of accurate, timely results for outpatients as well.

Turnaround Time: 1-2 days from receipt in our laboratory
Price: $60.00

In order to meet the need for this important testing, we are developing assays on multiple platforms. Our methods are scientifically based and well validated with high sensitivity and specificity. We have accurately and successfully completed inter-laboratory comparison studies with the Oregon State Lab as well as the University of Washington. To date, we have tested more than 1000 specimens with an 8% positivity rate. The methods currently in use are:

RealStar® SARS-CoV-2 Test
Cobas® SARS-CoV-2 Test

M4 viral transport media continues to be available in limited quantities. Please contact LLS Sales and Marketing LegacyLaboratoryServ@lhs.org to request COVID-19 test kits.
