Coronavirus SARS-CoV-2 IgG Antibody

Results
Abnormal

Status: Final result (Collected: 6/16/2020 08:48)

6/16/2020 9:50 AM - Edi, Lab In Hlseven

Component

COVID-19 IgG Ab

Positive

Comment:

Antibodies to novel coronavirus SARS-CoV-2 detected, suggestive of recent or past infection. Clinical correlation is required. COVID-19 PCR testing is recommended to diagnose active infection.

NOTE: This chemiluminescent immunoassay (CIA) is designed for qualitative detection of IgG antibodies against spike proteins of the severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). Preliminary studies suggest minimal cross-reactivity with other coronaviruses.

The performance characteristics of this test were validated in a manner consistent with CLIA requirements by Legacy Laboratory Services, 1225 NE Second Ave, Portland OR. This test has been approved by the FDA under EUA.

Lab and Collection

Coronavirus SARS-CoV-2 IgG Antibody - 6/16/2020
