

Screening saves lives

Not sure you need a mammogram?

Breast cancer is the **No. 1** cause of death of African-American and Latina women ages 55–64

Breast cancer is the **No. 2** cause of death of women overall

1 in 8 women in the Northwest will be diagnosed with breast cancer in their lifetime

9 out of 10 breast cancer patients don't have a family history of breast cancer

The best way to beat breast cancer is to find it early

A mammogram is the gold standard for that. Mammograms find cancers up to two years before they can be felt.

100% of women will survive breast cancer if it's caught early (stage 1)*

72% of women will survive breast cancer if it's caught late (stage 3)*

22% of women will survive breast cancer if it's caught at the latest stage (stage 4)*
