

Emergency room or urgent care

Get the right care at the right time

Health problems don't always happen when your doctor's office is open. When you or your child needs care, use this list to help you decide if you should go to the ER or Legacy urgent care in your area.

If your injury or illness isn't as urgent, you can call your primary care doctor; many clinics can see you within a day or so. If you don't have a primary care doctor, call **503-335-3500** or go to **www.legacyhealth.org/findaprovider** to find a doctor who is right for you.

If you are having chest pain, symptoms of stroke or another serious illness or injury, please call 911.

Condition	Urgent Care	Emergency
