1. Provide a brief description of the project.

Capital Project #6274

Replacement CT - 128 Slice digital detector. The SOMATOM Definition Edge is based on the revolutionary Stellar Detector, the first fully-integrated detector. Designed to minimize electronic noise using Siemens’ innovative TrueSignal Technology, it significantly improves the signal-to-noise-ratio (SNR). This enables the unique Edge Technology. It allows the generation of ultra-thin slices of 0.5 mm facilitating a spatial resolution of 0.30 mm. This new level of spatial resolution in clinical routine that can visualize previously unseen details without an increase in dose, for example to allow more accurate stenosis and stent analysis. Additionally, the Stellar Detector with TrueSignal Technology is the perfect match for Siemens' comprehensive ultra-low-dose imaging portfolio. With its improved SNR, the Stellar Detector can handle low signals much more efficiently, thus delivering more diagnostic quality with less patient radiation.

2. Proposed start date: 10/1/2021

3. Date of approval by board: n/a; Legacy Collaboration Council Approval – various dates in 2021

4. Expected completion date: 3/31/2022

5. What is the expected project cost? $2,228,785 (current project budget) to $2,510,250 (planning estimates)

6. Describe the expected benefits to the community that your facility serves. Include both direct financial benefits such as charity care as well as qualitative benefits such as access to care and quality improvements. Attach additional pages if needed.

Current system is: a. item is obsolete, b. 13 years old, c. no, d. advanced and improved technology with dose reduction, e. multiple downtimes, unable to perform perfusion studies, f. trade in
7. In what ways may this project negatively impact the community that your facility serves? Include direct cost such as bonds as well as indirect impacts such as service interruptions. Attach additional pages if needed.

Legacy Meridian Park Medical Center provides free or reduced cost care to all patients who qualify under our charity care policies and services provided by this renovation would be included. Meridian Park provided $11.6 million in charity care in fiscal year 2021.

8. How has your facility evaluated the need for this project within the community that you serve?

This project was reviewed and evaluated by Legacy's Colloboration Council and previously the Legacy Capital Committee during its annual prioritization process.

9. Are the medical services created by this project already available in the community that your facility serves?

This is a replacement of an existing aging CT scanner at Meridian Park Medical Center.

---

**Public Notice and Comment**

1. Provide a link to the webpage where public notice of the capital project was posted. If your facility does not maintain a webpage provide the name of the newspaper where the public notice was made and date of publication. Attach additional pages if needed.

https://www.legacyhealth.org/Policies/Capital-Reporting

2. Describe your facility’s method of collecting and reviewing public comments on the capital project. Attach additional pages if needed.

We will post a copy of this CPR-1 form on our website (see link above) with an email address for comments to be sent to. All comments received will be reviewed and summarized by Financial Planning and reported to the President of the hospital and the Chief Financial Officer of Legacy Health.
